

Italfoam

Italfoam is a well-established company since 2006 as a manufacturer of home and office furniture.

During the years, it is distinguished itself from the others by high professionalism with which it carries out the own specific activity. To this end, right from its very beginnings Italfoam has enjoyed the collaboration of master workers who dedicate their skills to the production of unique and Modern styles. A young dynamic company, it has known how to combine, through the years, experiences, stimuli and different ideas, always aiming at a happy marriage between innovative design and product functionality.

Quality is not just a characteristic of the product, but is a concept which is the bedrock of our way of thinking, creating and producing. A concept which requires commitment and skills, to ensure total satisfaction and service for the customer.

Italfoam is therefore not just a furniture manufacture; it conveys experiences and emotions, it conceives interior design as the advance and evolution of a lifestyle.
